Profile

I am an entry-level programmer that has 6 months of experience. I am an undergraduate student, a 1st-year college, currently taking Bachelor of Science, Major in Computer Engineering. I don't have any working experience yet. I have skills in Auto CAD together with C and C++ programming languages. I am good at algorithms and problem-solving. I can adapt easily and cooperate in projects and teamwork. I'm good at managing my time and working under pressure. I'm also good at Microsoft PowerPoint since I have been using it to make presentations when I was in Senior High. I have professional experience in music since I am performing as an organist in our church and I have good background knowledge about music.

Education

BS Major in Computer Engineering, Technological Institute of the Philippines, Quezon City, *August 2020 – Present*

Science, Technology, Engineering, and Mathematics, Binangonan Catholic College, Binangonan, *June 2014 – March 2020*

Pilapila Elementary School, *July 2007 – April 2014*

Personal Experiences

Church Organist, Binangonan, *January 2017 – Present*

This is not a working experience, but this is my personal experience as a musician. I am performing and playing the piano every day. It's not that I get paid but it's just for an allowance, so yes, I'm getting paid for it for a small amount, just a service fee. I have professional experience in the field of music. I can transcript and arrange musical pieces in different instruments. I have a good sense of hearing.

Internships

Library Assistant, Binangonan, *February 2020 –March 2020*

From my personal experience of being a library assistant, I can say that this experience made me realize that time is really an important matter. Actually, it is where I applied for an internship for our school way back in February 2020.
